

Standard Line Level

Use the Empire® Level Standard Line Level for making sure your work is level, whether you're landscaping, plumbing or working with sheet metal. The tool weighs only 0.25 pounds, which helps reduce the chances of your line sagging. Made of durable plastic, the Empire Level standard line level stands up against harsh job site conditions and is resistant to corrosion. It features an unbendable open hook, which lets the level slide easily and freely up and down the line. A pocket clip on the Empire Level lightweight line level makes portability easy; it attaches to your tool belt or pocket quickly when not in use. The pocket clip also keeps the level nearby and helps prevent accidental loss on a cluttered job site.

INCLUDES:

[\(1\) Standard Line Level \(83-50\)](#)

FEATURES:

- Lightweight construction minimizes line sag
- Unbendable open hooks allow level to slide freely
- Made in USA
- 1 year limited warranty
