BRACKETING KITS AND ACCESSORIES

SMART IN-WALL SOLUTIONS

The most trusted name in the plumbing industry is proud to deliver in-wall bracketing solutions designed to make your job easier, faster and safer. Available as individual parts or in convenient kits, Oatey bracketing systems are carefully engineered to accommodate a wide range of PEX, CPVC and copper pipe support needs and plumbing applications including sinks, lavatories, water heaters, toilet stub-outs, shower heads and tub spouts.

Pre-assembled parts allow for simple, straightforward installation and save valuable time, whether you are pre-fabricating or installing on the job. Kits come complete with everything needed for installation and include fewer parts than the competition – which means less to handle on the jobsite.

SLIDING WALL BRACKETS AND STUB-OUT KITS

- Extendable bracket allows for quick and easy install at multiple depths and stud widths – no measuring or cutting required
- Designed for mounting pipes, electrical boxes and conduit between studs
- Easy to adjust width using hands to slide bracket open and close
- Durable, lightweight steel construction

LIGHT ANGLED WALL BRACKETS AND STUB-OUT KITS

- Used to support vertical piping and horizontal stub-outs within the wall
- Hole pattern allows for adjustable stub-outs every 2 in. $\pm$ 1/2 in.
- Bracket accommodates different stud spacing, making installation easy
- Four mounting points for added strength and stability
- Durable steel construction

SMART IN-WALL SOLUTIONS

Choose from compatible accessories that are designed to maximize bracket functionality. Oatey brackets are designed to be compatible with all accessories when mounted, allowing for flexibility during the installation process.

Showing Dual Wall Bracket

Showing Universal Strut Adaptor

SELF-CLOSING CLAMPS feature a self-closing mechanism for quick and easy pipe fixing and can be used on sliding wall brackets, light angled wall brackets or the mounting surface itself.

- **DUAL WALL BRACKET** creates the perfect spacing between hot and cold water lines and is quick to install two pipes with a single screw
- **UNIVERSAL STRUT ADAPTOR** mounts self-closing clamps to a strut or sliding wall bracket
- **THREADED ROD ADAPTOR** mounts self-closing clamps to a threaded rod

COMBO CLAMPS can be mounted directly to brackets, studs and walls and feature multi-use mounting holes for installation versatility.

- Larger clamp sizes include optional insert, allowing for use with two different sizes of pipe
- Manufactured nubs on combo clamp act as a level to ensure installation accuracy

STUB-OUT CLAMPS fit into both sliding wall brackets and light angled wall brackets effortlessly, with options for CPVC, copper or PEX pipe.

90° PEX BEND SUPPORT allows for easy snap-in of PEX tubing, replacing the need to slide pipe into stub-out assemblies. Made of durable polypropylene, this bend support's unique struggle-free installation requires no kinking or bending of the PEX — simply snap the pipe into the bracket. It features a high-lipped design that helps reduce damage to the PEX tube.
