NO LEAD FULL PORT PRESS-TO-CONNECT BALL VALVE WITH WASTE

P-202NL LegendPress®

Dezincification-resistant (DZR) forged brass resists corrosion from exposure to a wide variety of water conditions.

Press-to-connect end connections are designed for installation onto ASTM B88 types K, L and M hard-drawn copper tubing. Coiled (annealed) soft copper tubing is not recommended, but can be used if ends are made round.

End connections are compatible with commercially-available VUS profile jaws.

Waste drain allows line to be drained for maintenance or to prevent freeze-up; an ideal isolation/winterization valve for exterior sillcock installations.

Available in nominal CTS sizes 1/2" to 1".

Working Pressure, Non Shock (PSI)

Cold working pressure (CWP): 250 psi

Saturated steam (WSP): Not suitable for steam service

Maximum Service Temperature: 250 °F
