

# Accessories & Parts

## 131-ABNF

### Product Type

Thermostatic mixing valve for single or multiple faucet installations

### Features & Specifications

- Adjustment cap with locking feature
- Brass body construction with corrosion-resistant internal components, includes plastic wall bracket
- Standard 3/8" compression inlets and outlet
- Integral inlet check valves to protect against cross-flow
- ECAST® design provides durable cast brass construction with total lead content equal to or less than 0.25% by weighted average
- Complies with the requirements of the Buy American Act of 1933.
- CFNow! Item Ships in 3 Days

### Warranty

- 1-Year Limited Cartridge Warranty
- Lifetime Limited Faucet Warranty
- 1-Year Limited Finish Warranty
- 1-Year Limited Material Warranty

### Codes & Standards

-  ASSE 1070/ASME A112.1070/CSA B125.70
-  NSF/ANSI/CAN 372 Low Lead Content
-  NSF/ANSI/CAN 61, Section 9

## Architect/Engineer Specification

Chicago Faucets No. 131-ABNF, ECAST® Thermostatic Mixing Valve. Standard 3/8" compression inlets and outlet. Integral inlet check valves to protect against cross-flow. Adjustment cap with locking feature. Brass body construction. Corrosion resistant internal components. Thermostatic wax element design. Thermostat controls both hot and cold water. Installs between the stop valves and the faucet. Single use or multiple faucet installations. Minimum supply pressure: 30psi (207 kPa); Hot inlet temperature: 120°F to 180°F (49°C to 82°C). Outlet water temperature will be less than hot water inlet temperature. Includes wall bracket. Minimum flow rate: 0.35 gpm (@ min. 20 psi). Maximum flow rate: 4.6 gpm (@ min. 125 psi). Temperature out: 80°F to 120°F (27°C to 49°C). ECAST® construction with less than 0.25% lead content by weighted average.

### Pressure - Temperature

|   |                             |
|---|-----------------------------|
| Minimum Supply Pressure:                | 30 psi (207 kPa)            |
| Hot Inlet Temperature:                  | 120°F – 180°F (49°C – 82°C) |
| Cold Inlet Temperature:                 | 39°F – 80°F (4°C – 27°C)    |
| Minimum Inlet Temperature Differential: | 20°F (7°C)                  |
| Temperature Out:                        | 80°F – 120°F (27°C – 49°C)  |
| Factory Setting:                        | 100.4°F                     |
| Maximum Pressure:                       | 125 psi (8.6 bar)           |

The pressure differential must be less than 20% between the hot and cold inlet supplies.

### Flow Capacity: Pressure vs. GPM

## Operation and Maintenance

Installation should be in accordance with local plumbing codes. Flush all pipes thoroughly before installation. After installation, remove spout outlet or flow control and flush faucet thoroughly to clear any debris. Care should be taken when cleaning the product. Do not use abrasive cleaners, chemicals or solvents as they can result in surface damage. Use mild soap and warm water for cleaning and protecting the life of Chicago Faucet products. For specific operation and maintenance refer to the installation instructions and repair parts documents that are located at [www.chicagofaucets.com](http://www.chicagofaucets.com).

Chicago Faucets, member of the Geberit Group, is the leading brand of commercial faucets and fittings in the United States, offering a complete range of products for schools, laboratories, hospitals, office buildings, food service, airports and sport facilities. Call 1.800.TECTRUE or 1.847.803.5000 Option 1 for installation or other technical assistance.
